BDPB104HW

10 kg Sensor Controlled Wifi Connected Hybrid Heat Pump Tumble Dryer with Steam

RapiDry™ - Beko RapiDry™ gives you perfect flexibility drying your clothes. A hybrid type tumble dryer which merges conventional heater and heat pump technology. This lets you choose between drying quickly and drying energy efficiently. You can even dry 5kg laundry in one hour and still have the option of an energy-saving program. Choose the program that suits you.

Ready to Wear - Ironing your clothes everyday can be tiring. Beko's IronFinish dryers take care of the hassle for you. With the help of steam created by water mist, casual shirts come out ready to wear* and ironing is easier for business shirts as they are less creased.

*Ready to wear results from independent testing obtained for casual shirts with 100% cotton, 100% polyester, 100% viscose and 56% cotton/44% polyester blend in the Ready to Wear program. Tested by Third Party Lab

Eco Friendly- Heat Pump Technology with environmentally friendly R290 refrigerant. Beko is very committed to the respect of the environment, the fight against climate change and the protection of nature. R290 refrigerant is better for the environment than standard refrigerants used in other tumble dryers.

Wifi Connected/Download Programs - Easily control your tumble dryer from your smartphone with our HomeWhiz technology Wizard. You can also download new programmes, set them as your favourite and remotely control and monitor your tumble dryer, all without needing to be in the room.
