60 cm Induction Flexy Direct Access 4 Zone Cooktop

Flexy Zones/ Move Function - Make more room when you're cooking for company. The new IndyFlex+ hob has 8 zones you can use separately or combine in fours to use as 2 large units. Plus, one additional zone in the middle of the hob helps create even larger zones, with the hob automatically adjusting to match the size of your pots and pans. And with Move Function the temperature adjusts through the pan movements so you don't have to.

Direct Access Control - Giving you complete control and flexibility in the kitchen, touch controls for each cooking zone allow you to adjust the heat level of your pots and pans separately, at the simple touch of a button.

Automatic Functions - With the Automatic Functions from Beko you can choose from Fry, Simmer and Keep Warm settings, to cook all parts of your meal perfectly with just one button.
