

REFRIGERATOR CATALOGUE

beko

2023 / 2024

HARVESTfresh™

HarvestFresh's 3-colour technology mimics the 24-hour sun-cycle inside the crisper, preserving vitamins for longer. This unique technology inside your crisper will allow you to enjoy nutritious meals and a healthier lifestyle.

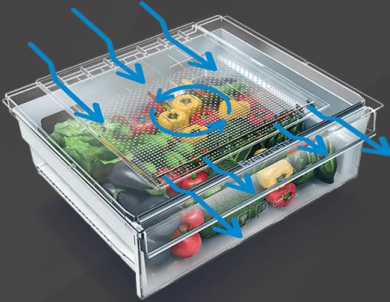

NutriFreeze™

Meat and fish can be kept fresh for up to 7 days without the need for deep freezing thanks to Beko's NutriFreeze technology. You may cook meat and fish straight from the refrigerator without losing any of their flavor or nutritional value thanks to NutriFreeze technology, which also prevents you from spending time for defrosting

EVERfresh+

Precise temperature and humidity controls minimize condensation in your crisper, keeping your fruit & veg fresh for up to 30 days so you have all the healthy ingredients whenever you need them.

NEOfrost™

NeoFrost Dual Cooling's separate cooling systems for each compartment maintain ideal air flow and optimal temperatures in both the freezer and the fridge. As a result, food stays fresh for longer with no frost build-up or odour transfer.

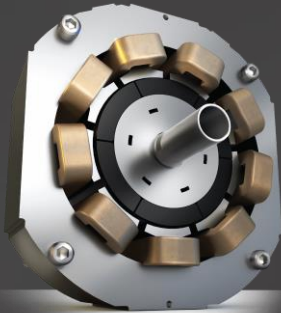

Active Fresh Blue Light

Fresh food sometimes loses their vitamins standing around in the fridge. Active Fresh Blue Light helps fruit and veg to continue photosynthesizing, preserving vitamin C levels, natural flavours and nutrients in fruits and veg, and keeping them fresh for up to 30% longer. That means less shopping for you and healthier meals for the family.

ProSmart Inverter Compressor

The ProSmart Inverter Compressor provides faster cooling with less energy and four times quieter operation than average refrigerator compressors. It adapts to temperature fluctuations quicker, keeps food fresh longer and saves on your energy bills, all at the same time

MultiZone

The flexible MultiZone compartment gives you extra freezer or fridge space instantly and for you to organise however you want. Adjust the temperature from -24°C to 10°C with the touch of a button and never worry how you'll squeeze in all that stuff from the store into the refrigerator.

IonGuard

Beko's IonGuard™ technology helps to not only eliminate odors but to prevent odor transfer between food. By creating a fresh-air environment inside your refrigerator, IonGuard provides an odorless refrigerator that preserves food longer.

Vacation Mode

The Vacation Mode turns the cooler off and keeps the freezer running. If you are leaving for a month or longer, throw away any food which will spoil, put everything else in the freezer and set your refrigerator to vacation mode

Multi Airflow

Multi Airflow technology provides blowers around the fridge to ensure cool air is circulated evenly around for optimal and even temperature in the entire compartment.

French Door Refrigerators

GNO51651VKMY

4 Door Freezer Bottom

Capacity

- Total Gross Volume: 586 Litre
- Net Volume: 522 Litre

Key Features

- Prosmart Inverter Compressor
